Specification

- Housing steel
 - Turned
 - Zinc plated, blue passivated
 - Ball steel, plain
- RoHS

On request

- Plastic balls (Polyamide)
- Stainless steel balls
- Stainless steel housings

SBL

Information

Ball transfer units GN 509.4 are used on conveyer tracks. They assist a linear or rotary movement of heavy loads on a conveyer track.

They have no support collar, taking the load at the housing diameter d_2 instead.
